

Fire Safety Plan Boxes provide fire crews easy access to important building information such as the location of electrical panels, gas shut-off valves, elevators and stairways. The fire safety plan box should be surface mounted within 3 metres of the main entrance of the premises at a height between 1.5 metres to 1.8 metres above the floor.

For our customers in the GTA: As of January 1st, 2005, the City of Toronto began enforcing By-law No. 186-2004 stating that:

Every person who is required under the Fire Code to prepare and implement a fire safety plan approved by the Chief Fire Official shall install and maintain on his or her premises a locked fire safety plan box. For more details please consult: **City of Toronto: By-law 186-2004**  
<http://www.toronto.ca/legdocs/bylaws/2004/law0186.pdf>

The City of Toronto requires that Fire Safety Plan boxes be locked using a padlock. The Region of Peel requires that Fire Safety Plan boxes be locked using a key lock.
